

ACCESS IX

ATMOSPHERIC CHEMISTRY COLLOQUIUM FOR EMERGING SENIOR SCIENTISTS

Call for Applications

The ninth biennial ACCESS (Atmospheric Chemistry Colloquium for Emerging Senior Scientists) research colloquium for new PhDs in atmospheric chemistry will be convened at, Yellowstone National Park, Wyoming on August 23-26, 2007. Participants will be invited to attend both ACCESS and the Gordon Research Conference (GRC) in Atmospheric Chemistry scheduled for August 26-31, 2007 to be held at the Big Sky Resort in Montana. The colloquium is jointly sponsored by, the Department of Energy (DOE), the National Aeronautical and Space Administration (NASA), the National Oceanic and Atmospheric Administration (NOAA), and the National Science Foundation (NSF).

The purpose of the ACCESS is to bring together—in scientific discussion and interaction—recent PhDs in atmospheric chemistry and doctoral candidates soon to receive their degrees, together with representatives of the principal federal government agencies that fund atmospheric chemistry research. The meetings will provide an opportunity to forge future professional relationships, and the entire atmospheric science community will benefit by becoming more aware of innovations in atmospheric chemistry through these researchers' efforts.

To be eligible to be an invited participant at ACCESS, an applicant must have received a doctorate from an accredited university after June 1, 2005, or alternatively, provide certification that in all probability the applicant will receive a degree before August 31, 2008. The applicant's thesis or postdoctoral research must deal with an important problem in atmospheric chemistry. Attendance at ACCESS is limited to 25 participants. Support for your participation at both the ACCESS and GRC will be provided, including all required transportation.

Applications for attendance at ACCESS IX may be downloaded from <http://www.asp.bnl.gov/ACCESS> or obtained from newman@bnl.gov and must be submitted by May 1, 2007.
